SIEMENS

Siemens India, a key arm of Siemens AG, focuses on industry, infrastructure, digital transformation, transport, and power generation and transmission. Its business is designed to enhance industrial efficiency, quality, flexibility, and speed.

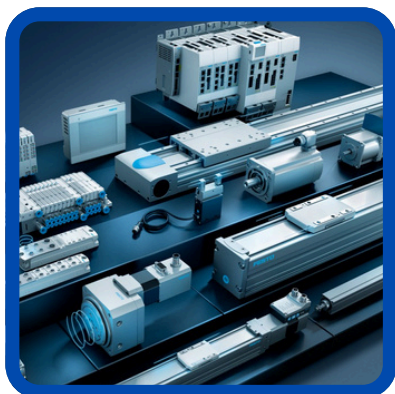

SICK

From factory to logistics automation, SICK's smart sensor solutions keep industries moving. As a market leader, SICK ensures safe, efficient processes while protecting people and the environment

OMRON

OMRON offers a wide range of automation sensors, including photoelectric, proximity, fiber, ultrasonic, pressure, vibration sensors, and more for diverse industrial applications.

FESTO

In pneumatics, compressed air powers actuators to create movement in industrial automation, controlled efficiently through valves or valve terminals.

ABB

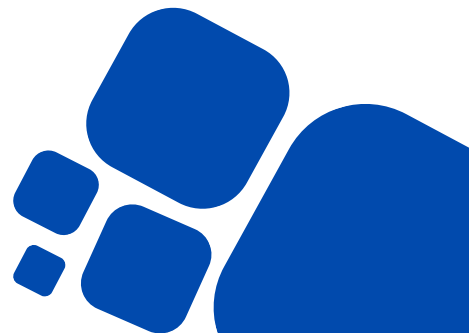

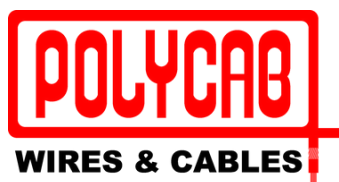

ABB Drives delivers advanced variable speed drives and systems, helping industries boost energy efficiency, reliability, safety, and performance.

Your Connection to Reliable Power – Polycab Solutions

Polycab is one of India's leading manufacturers of wires and cables, known for quality, safety, and durability. Polycab wires are made with high-grade electrolytic copper or aluminum conductors, designed to ensure excellent conductivity and energy efficiency. Polycab wires are used in residential, commercial, and industrial electrical installations for wiring of lighting circuits, power distribution, appliances, control panels, and more.

Engineered for Electrical Excellence

Power up with switchgear that meets global standards. High endurance, compact design, and exceptional performance—built to last.

We offer Siemens, ABB, and Schneider switchgear trusted worldwide for premium quality and protection in power systems.

About Us

Swasty Prasad we are a trusted provider of industrial automation solutions, specializing in the integration, and commissioning of PLC, HMI, SCADA, and VFD systems. With a commitment to innovation and quality, we help industries automate and optimize their processes for maximum efficiency, safety, and reliability.

Our expertise spans:

- PLC Systems
- HMI Solutions
- SCADA Systems and remote management.
- Variable Frequency Drives (VFDs) — Energy-efficient motor control solutions that improve performance and reduce operating costs.

We believe in building long-term partnerships through innovative solutions, prompt service, and unwavering commitment to quality.

Delivering the World to Your Doorstep:

We export top-grade automation products from trusted brands like Siemens, ABB, Schneider, Omron, Festo, SICK, Polycab, Finolex, and Havells. Our range includes PLCs, HMIs, VFDs, Switchgear, and Cables — delivered with assured quality and prompt support.

Empowering Industries — Automating the Future.

Let's Work Together

Why Partner With Us?

- Customized, end-to-end solutions for diverse industries.
- Experienced engineering team with proven track record.
- Focus on quality, reliability, and future-ready technology.
- Commitment to responsive service and long-term support.

Our Brands

- Siemens
- ABB
- Polycab
- Finolex
- RR Kabel

Let's automate success — together.

Contact us today to discuss your next project or explore partnership opportunities.
